Such forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause actual results, events or developments to be materially different from any future results, events or developments expressed or implied by such forward-looking statements. Such factors include, among others, the following: general economic and business conditions, both nationally and in the regions in which the Company operates; changes in business strategy or development/acquisition plans; environmental exposures; financing risk; existing governmental regulations and changes in, or failure to comply with, governmental regulations; liability and other claims asserted against the Company; risks and uncertainties relating to pandemics or epidemics; and other factors referred to in the Company's filings with Canadian securities regulators. Given these uncertainties, readers are cautioned not to place undue reliance on such forward-looking statements. The Company does not assume the obligation to update or revise any forward-looking statements.

SPECIFIED FINANCIAL MEASURES

Morguard Corporation reports its financial results in accordance with IFRS. However, this MD&A also uses specified financial measures that are not defined by IFRS, which follow the disclosure requirements established by National Instrument 52-112 *Non-GAAP and Other Financial Measures Disclosure*. Specified financial measures are categorized as non-GAAP financial measures, non-GAAP ratios and other financial measures, which are capital management measures, supplementary financial measures and total of segments measures.

NON-GAAP FINANCIAL MEASURES

Non-GAAP financial measures do not have any standardized meaning prescribed by IFRS and are not necessarily comparable to similar measures presented by other reporting issuers in similar or different industries. These measures should be considered as supplemental in nature and not as a substitute for related financial information prepared in accordance with IFRS. The Company's management uses these measures to aid in assessing the Company's underlying core performance and provides these additional measures so that investors may do the same. Management believes that the non-GAAP financial measures described below, which supplement the IFRS measures, provide readers with a more comprehensive understanding of management's perspective on the Company's operating results and performance.

The following discussion describes the non-GAAP financial measures the Company uses in evaluating its operating results:

ADJUSTED NOI

Net operating income ("NOI") and Adjusted NOI are important measures in evaluating the operating performance of the Company's real estate properties and are a key input in determining the fair value of the Company's properties. Adjusted NOI represents NOI (an IFRS measure) adjusted to exclude the impact of realty taxes accounted for under IFRIC 21 as noted below.

NOI includes the impact of realty taxes accounted for under the International Financial Reporting Interpretations Committee ("IFRIC") Interpretation 21, Levies ("IFRIC 21"). IFRIC 21 states that an entity recognizes a levy liability in accordance with the relevant legislation. The obligating event for realty taxes for the U.S. municipalities in which the Company operates is ownership of the property on January 1 of each year for which the tax is imposed and, as a result, the Company records the entire annual realty tax expense for its U.S. properties on January 1, except for U.S. properties acquired during the year in which the realty taxes are not recorded in the year of acquisition. Adjusted NOI records realty taxes for all properties on a *pro rata* basis over the entire fiscal year.

A reconciliation of Adjusted NOI is presented in Part III, "Review of Operational Results."

COMPARATIVE NOI

Comparative NOI is presented in this MD&A because management considers this non-GAAP financial measure to be an important measure of the Company's operating performance for properties owned by the Company continuously for the current and comparable reporting period and does not take into account the impact of the operating performance of property acquisitions and dispositions as well as properties subject to significant change as a result of recently completed development. In addition, Comparative NOI is presented in local currency, isolating any impact of foreign exchange fluctuations, and eliminates the impact of straight-line rents, realty taxes accounted for under IFRIC 21, lease cancellation fees and other non-cash and non-recurring items.

A reconciliation of Comparative NOI is presented in Part III, "Review of Operational Results."

FUNDS FROM OPERATIONS ("FFO") AND NORMALIZED FFO

FFO (and FFO per common share) is a non-GAAP financial measure widely used as a real estate industry standard that supplements net income (loss) and evaluates operating performance but is not indicative of funds available to meet the Company's cash requirements. FFO can assist with comparisons of the operating performance of the Company's real estate between periods and relative to other real estate entities. FFO is computed by the Company in accordance with the current definition of the Real Property Association of Canada ("REALPAC") and is defined as net income (loss) attributable to common shareholders adjusted for: (i) deferred income taxes, (ii) unrealized changes in the fair value of real estate properties, (iii) realty taxes accounted for under IFRIC 21, (iv) internal leasing costs, (v) gains/losses from the sale of real estate or hotel property (including income tax on the sale of real estate or hotel property), (vi) transaction costs expensed as a result of a business combination, (vii) gains/losses on business combination, (viii) the non-controlling interest of Morguard North American Residential Real Estate Investment Trust ("Morguard Residential REIT"), (ix) amortization of depreciable real estate assets (including right-of-use assets), (x) amortization of intangible assets, (xi) principal payments of lease liabilities, (xii) FFO adjustments for equity-accounted investments, (xiii) provision for (recovery of) impairment, and (xiv) other fair value adjustments and non-cash items. The Company considers FFO to be a useful measure for reviewing its comparative operating and financial performance. FFO per common share is calculated as FFO divided by the weighted average number of common shares outstanding during the period.

Normalized FFO (and Normalized FFO per common share) is computed as FFO excluding non-recurring items on a net of tax basis and other non-cash fair value adjustments. The Company believes it is useful to provide an analysis of Normalized FFO which excludes non-recurring items on a net of tax basis and other non-cash fair value adjustments excluded from REALPAC's definition of FFO described above.

A reconciliation of net income (loss) attributable to common shareholders (an IFRS measure) to FFO and Normalized FFO is presented in Part III, "Funds From Operations."

NON-CONSOLIDATED MEASURES

The Trust Indenture and subsequent Supplemental Indentures (collectively, the "Indenture") that govern the Company's senior unsecured debentures ("Unsecured Debentures") are subject to the following definitions and covenants, and are calculated based on the Company's financial results prepared in accordance with IFRS, adjusted to account for Morguard Real Estate Investment Trust ("Morguard REIT") and Morguard Residential REIT (collectively the Company's "Public Entity Investments"), using the equity method of accounting and other adjustments as defined by the Indenture described below ("Non-Consolidated Basis" or "Morguard Non-Consolidated Basis"). The presentation of Non-Consolidated Basis measures represents a non-GAAP financial measure and may not accurately depict the legal and economic implications to the Company.

The Company calculates an interest coverage ratio, an indebtedness to aggregate assets ratio and an adjusted shareholders' equity covenant on a Non-Consolidated Basis, and they are presented in this MD&A because management considers these non-GAAP financial measures to be an important measure to evaluate and monitor the Company's compliance with its Indenture.

Non-Consolidated Basis adjustments include the following:

- An adjustment (as defined in the Indenture) to account for the Company's Public Entity Investments using the equity method of accounting. The adjustment requires the Public Entity Investments which are consolidated under IFRS to each respective financial statement line presented within the balance sheet and statement of income (loss) to be presented on a single line within equity-accounted investments;
- An adjustment (as defined in the Indenture) to the balance sheet to exclude deferred tax assets and liabilities, goodwill, and to add back accumulated amortization of hotel properties; and
- An adjustment (as defined in the Indenture) to the statement of income (loss) to exclude other non-cash items (such as the Company's stock appreciation rights ("SARs") expense, IFRIC 21 and any gain or loss attributed to the sale or disposition of any asset or liability), non-recurring items (such as acquisition-related costs and debt settlement or other costs), and to include the distributions received from Morguard REIT and Morguard Residential REIT.

The presentation of the non-consolidated balance sheet does not classify short-term and long-term assets and liabilities. In addition, other assets as presented in the non-consolidated balance sheet, group amounts receivable; prepaid expenses and other; and cash that are presented as a separate financial statement line in the Company's consolidated balance sheet, and loans payable and bank indebtedness that are presented as a separate financial statement line in the Company's consolidated balance sheet, have been grouped as a single financial statement line in the non-consolidated balance sheet.

Non-GAAP financial measures that are calculated on a Non-Consolidated Basis are as follows. A reconciliation of the Non-Consolidated Basis inputs (discussed below) used in calculating the covenants from their most directly comparable IFRS financial measure are presented in Part IV, "Balance Sheet Analysis."

Non-Consolidated EBITDA

Non-consolidated EBITDA is defined as net income (loss) on a Non-Consolidated Basis before interest expense, income taxes, amortization, fair value adjustments to real estate properties, acquisition-related costs, debt settlement or other costs, any gain or loss attributed to the sale or disposition of any asset or liability, provision for (recovery of) impairment, other non-cash items and non-recurring items, plus the distributions received from Morguard REIT and Morguard Residential REIT. Non-consolidated EBITDA is presented in this MD&A because management considers this non-GAAP financial measure to be an important input to the Company's compliance measure on a Non-Consolidated Basis.

Non-Consolidated Interest Expense

Non-consolidated interest expense is defined as interest expense and interest capitalized to development properties on a Non-Consolidated Basis. Non-consolidated interest expense is presented in this MD&A because management considers this non-GAAP financial measure to be an important input to the Company's compliance measure on a Non-Consolidated Basis.

Non-Consolidated Indebtedness

Non-consolidated indebtedness (as defined in the Indenture) is a measure of the amount of debt financing utilized by the Company on a Non-Consolidated Basis. Indebtedness is presented in this MD&A because management considers this non-GAAP financial measure to be an important input to the Company's compliance measure on a Non-Consolidated Basis.

Non-Consolidated Aggregate Assets

Non-consolidated aggregate assets (as defined in the Indenture) is a measure of the value of the Company's assets on a Non-Consolidated Basis, adjusted to exclude goodwill and deferred income tax assets and to add back accumulated amortization of hotel properties. Non-consolidated aggregate assets is presented in this MD&A because management considers this non-GAAP financial measure to be an important input to the Company's compliance measure on a Non-Consolidated Basis.

Non-Consolidated Adjusted Shareholders' Equity

Non-consolidated adjusted shareholders' equity is defined as shareholders' equity computed on a Non-Consolidated Basis adjusted to exclude deferred tax assets and liabilities and to add back accumulated amortization of hotel properties. Non-consolidated adjusted shareholders' equity is presented in this MD&A because management considers this non-GAAP financial measure to be an important compliance measure and establishes a minimum equity requirement for the Company.

NON-GAAP RATIOS

Non-GAAP ratios do not have any standardized meaning prescribed by IFRS and are not necessarily comparable to similar measures presented by other reporting issuers in similar or different industries. These measures should be considered as supplemental in nature and not as a substitute for related financial information prepared in accordance with IFRS. The Company's management uses these measures to aid in assessing the Company's underlying core performance and provides these additional measures so that investors may do the same. Management believes that the non-GAAP ratios described below provide readers with a more comprehensive understanding of management's perspective on the Company's operating results and performance.

The following discussion describes the non-GAAP ratios the Company uses in evaluating its operating results:

NON-CONSOLIDATED INTEREST COVERAGE RATIO

Non-consolidated interest coverage ratio measures the amount of cash flow available to meet annual interest payments on the Company's indebtedness on a Non-Consolidated Basis and is defined as non-consolidated EBITDA divided by non-consolidated interest expense. Generally, the higher the interest coverage ratio, the lower the credit risk. Non-consolidated interest coverage ratio is presented in this MD&A because management considers this non-GAAP measure to be an important compliance measure of the Company's operating performance.

NON-CONSOLIDATED INDEBTEDNESS TO AGGREGATE ASSETS RATIO

Non-consolidated indebtedness to aggregate assets ratio is a compliance measure and establishes the limit for financial leverage of the Company on a Non-Consolidated Basis. Non-consolidated indebtedness to aggregate assets ratio as well as non-consolidated indebtedness to gross book value (defined below) ratio are presented in this MD&A because management considers these non-GAAP measures to be an important compliance measure of the Company's financial position.

SUPPLEMENTARY FINANCIAL MEASURES

Supplementary financial measures represent a component of a financial statement line item (including ratios that are not non-GAAP ratios) that are presented in a more granular way outside the financial statements, calculated in accordance with the accounting policies used to prepare the line item presented in the financial statements.

The following discussion describes the supplementary financial measures the Company uses in evaluating its operating results:

TOTAL REVENUE

Total revenue is calculated as the sum of revenue from real estate properties, revenue from hotel properties, management and advisory fees and interest and other income, and is presented in this MD&A because management considers this supplementary financial measure to be an important measure in evaluating the operating performance of the Company's income generating assets and services.

GROSS BOOK VALUE

Gross book value is a measure of the value of the Company's assets and is calculated as total assets less right-of-use assets accounted for under IFRS 16, Leases. Gross book value is presented in this MD&A because management considers this supplementary financial measure to be an important measure of the Company's asset base and financial position.

INDEBTEDNESS

Indebtedness is defined as the sum of the current and non-current portion of: (i) mortgages payable, (ii) Unsecured Debentures, (iii) convertible debentures, (iv) bank indebtedness, and (v) loans payable. Indebtedness is a measure of the amount of debt financing utilized by the Company. Indebtedness is presented in this MD&A because management considers this supplementary financial measure to be an important measure of the Company's financial position.

INDEBTEDNESS TO GROSS BOOK VALUE RATIO

Indebtedness to gross book value ratio is defined as indebtedness divided by gross book value, and is presented in this MD&A because management considers this supplementary financial measure to be an important measure of the Company's financial leverage.

CAPITAL MANAGEMENT MEASURES

The Company's capital management is designed to maintain a level of capital that allows it to implement its business strategy while complying with investment and debt restrictions, as well as existing debt covenants, while continuing to build long-term shareholder value and maintain sufficient capital for contingencies.

The following discussion describes the Company's capital management measures:

LIQUIDITY

Liquidity is calculated as the sum of cash, amounts available under its revolving credit facilities and any committed net additional mortgage financing proceeds, and is presented in this MD&A because management considers this capital management measure to be an important measure of the Company's financial position, as well as for determining the annual level of dividends to common shareholders.

PART II

BUSINESS OVERVIEW

Morguard Corporation is a real estate investment company whose principal activities include the acquisition, development and ownership of multi-suite residential, commercial and hotel properties. Morguard is also one of Canada's premier real estate investment advisors and management companies, representing major institutional and private investors. Morguard's total assets under management (including both owned and managed assets) were valued at \$19.1 billion as at June 30, 2025. The Company's common shares are publicly traded and listed on the Toronto Stock Exchange ("TSX") under the symbol "MRC." The Company's primary goal is to accumulate a portfolio of high-quality real estate assets and then deliver the benefits of such real estate ownership to shareholders.

MANAGEMENT AND ADVISORY SERVICES

The Company, through its wholly owned subsidiary, Morguard Investments Limited ("MIL"), provides real estate management services to Canadian institutional investors. Services include acquisitions, development, dispositions, leasing, performance measurement, and asset and property management. For over 50 years, MIL has positioned itself as one of Canada's leading providers of real estate portfolio and asset and property management services. In addition, Morguard, through its wholly owned subsidiary, Lincluden Investment Management Limited ("Lincluden") offers institutional clients and private investors a broad range of global investment products across equity, fixed-income and balanced portfolios.

As of June 30, 2025, MIL together with Lincluden manages a portfolio (excluding Morguard's corporately owned assets and assets owned by Morguard REIT and Morguard Residential REIT) of assets having an estimated value of \$8.1 billion.

BUSINESS STRATEGY

Morguard's strategy is to acquire a diversified portfolio of commercial and multi-suite residential real estate assets both for its own accounts and for its institutional clients. The Company's cash flows are well diversified, given the revenue stream earned from its management and advisory services platform, the Company's corporately owned assets and the distributions received from its investment in Morguard REIT and Morguard Residential REIT. Diversification of the portfolio, by both asset type and location, serves to reduce investment risk. The Company will divest itself of non-core assets when proceeds can be reinvested to improve returns. A primary element of the Company's business strategy is to generate stable and increasing cash flow and asset value by improving the performance of its real estate investment portfolio and by acquiring or developing real estate properties in sound economic markets.

The Company's business strategy consists of the following elements:

- Increase property values and cash flow through aggressive leasing of available space and of space becoming available;
- Take advantage of long-standing relationships with national and regional tenants;
- Target and execute redevelopment and expansion projects that will generate substantial returns;
- Pursue opportunities to acquire or develop strategically located properties;
- Minimize operating costs by utilizing internalized functions, including property and asset management, leasing, finance, accounting, legal and information technology services; and
- Dispose of properties where the cash flows and values have been maximized.

Morguard's strategically diversified asset portfolio and healthy, conservative debt ratios and financial resources provide strength against economic and real estate cycles. Morguard has always been driven by our commitment to real estate for the long term. Our experience has proven that this persistence has driven greater value for our shareholders year over year, and our diversified portfolio and conservative debt level position us well against any potential challenges. We will continue to follow this approach.

Total assets as at June 30, 2025 were \$11,761,447, compared to \$11,759,428 as at December 31, 2024. Total assets increased by \$2,019, primarily due to the following:

- A decrease in real estate properties of \$25,026, mainly due to a decrease of \$222,598 due to the change in the U.S. dollar exchange rate, partially offset by capital and development expenditures of \$80,751, tenant incentives and leasing commissions of \$22,221 and a net fair value gain of \$96,459;
- An increase in amounts receivable of \$6,133;
- A decrease in equity-accounted and other fund investments of \$6,652;

- An increase in cash of \$23,367.

Total revenue during the three months ended June 30, 2025 increased by \$1,888 to \$280,419, compared to \$278,531 in 2024, primarily due to the following:

- An increase in revenue from real estate properties in the amount of \$1,731, primarily due to higher average monthly rent ("AMR"), net of an increase in vacancy within the multi-suite residential segment and an increase in vacancy at Penn West Plaza. In addition, revenue increased from the change in foreign exchange rate and from the net impact of acquisition and disposition of properties; and
- An increase in revenue from hotel properties in the amount of \$316, from an increase in occupancy, partially offset by a decrease in average daily rate ("ADR"), resulting in an overall increase in revenue per available room ("RevPar").

FOR THE THREE MONTHS ENDED JUNE 30, 2025

NET INCOME

Net income for the three months ended June 30, 2025 was \$54,865, compared to \$55,437 in 2024. The decrease in net income of \$572 for the three months ended June 30, 2025, was primarily due to the following:

- A decrease in net operating income of \$899, mainly due to a decrease in gross rent and an increase in vacancy costs at Penn West Plaza, resulting from the Obsidian Lease Expiry, and higher vacancy at multi-suite residential properties, partially offset by an increase in AMR at multi-suite residential properties, the change in foreign exchange rate and from the net impact of acquisition and disposition of properties;
- A decrease in amortization of hotel properties and other of \$1,459;
- A decrease in non-cash net fair value loss of \$7,173, mainly due to an increase in fair value gain on real estate properties and marketable securities, partially offset by an increase in fair value loss on Morguard Residential REIT units; and
- An increase in income tax expense (current and deferred) of \$7,145, mainly due to a higher fair value gain recorded on the Company's Canadian and U.S. properties.

FOR THE SIX MONTHS ENDED JUNE 30, 2025

NET INCOME

Net income for the six months ended June 30, 2025 was \$109,626, compared to \$172,206 in 2024. The decrease in net income of \$62,580 for the six months ended June 30, 2025 was primarily due to the following:

- A decrease in net operating income of \$5,573, mainly due to a decrease in gross rent and an increase in vacancy costs at Penn West Plaza, resulting from the Obsidian Lease Expiry, and higher vacancy at multi-suite residential properties, partially offset by an increase in AMR at multi-suite residential properties, the change in foreign exchange rate and from the net impact of acquisition and disposition of properties;
- An increase in non-cash net fair value gain of \$108,413, mainly due to an increase in fair value gain on real estate properties and marketable securities, and a decrease in fair value loss on other real estate funds investments, partially offset by an increase in fair value loss on Morguard Residential REIT units;
- A decrease in gain on sale of hotel properties of \$150,587 due to the sale of 14 hotel properties on January 18, 2024 ("Hotel Portfolio Disposition"); and
- An increase in income tax expense (current and deferred) of \$15,120, mainly due to a deferred tax increase from a higher fair value gain recorded on the Company's Canadian and U.S. properties, partly offset by a decrease in current taxes resulting from the disposal of properties in 2024.

Net operating income decreased by \$899, or 0.6%, for the three months ended June 30, 2025, to \$156,980, compared to \$157,879 generated in 2024, and is further analyzed by asset type below.

ADJUSTED NOI BY ASSET TYPE

For the three months ended June 30	2025	2024
Multi-suite residential	\$76,390	\$73,081
Retail	31,181	32,065
Office ⁽¹⁾	30,419	34,343

IFRIC 21 adjustment - retail	2,438	2,901
NOI	\$156,980	\$157,879

(1) Includes industrial properties with NOI for the three months ended June 30, 2025 of \$2,720 (2024 - \$2,639).

NOI from the multi-suite residential portfolio for the three months ended June 30, 2025 increased by \$3,892, or 4.5%, to \$89,600, compared to \$85,708 in 2024. The increase in NOI is due to the change in Adjusted NOI described below, and an increase in the IFRIC 21 adjustment of \$583.

Adjusted NOI from the multi-suite residential portfolio for the three months ended June 30, 2025 increased by \$3,309, or 4.5%, to \$76,390, compared to \$73,081 in 2024. The increase in Adjusted NOI is primarily due to the following:

- An increase in Canadian multi-suite residential properties of \$1,741 primarily resulting from:
 - An increase in AMR of 5.2% and a decrease in operating costs of 0.8%, partially offset by higher vacancy. The decrease in operating costs was mainly from lower insurance premiums and utilities due to lower rates, net of higher consumption, partly offset by higher property taxes and repairs and maintenance. In addition, the Company's Canadian portfolio turned over 216 suites, or 2.6% of total suites achieving AMR growth of 16.0% on suite turnover.
- An increase in U.S. multi-suite residential properties of US\$780 primarily resulting from:
 - An increase in revenue due to an increase in AMR of 0.4% and improved U.S. occupancy which increased to 95.1% at June 30, 2025, compared to 93.3% at June 30, 2024. The AMR growth rate is lower than historical average due to a more challenging leasing environment. Management expects more normalized AMR growth over the next several quarters in light of strong rental demand and higher occupancies. Partially offsetting higher revenue was an increase in operating costs by 3.1% mainly from higher administrative expenses, utilities and salary costs, net of a decrease in insurance premiums and bad debt expense. In addition, the Company's U.S. portfolio turned over 837 suites, or 8.7% of total suites, achieving AMR growth of 2.4% on suite turnover.
- An increase of \$788 due to the change in the U.S. dollar foreign exchange rate.

- A decrease in Canadian retail properties of \$1,095 primarily resulting from:
 - A decrease of \$662 primarily due to higher vacancy and higher bad debt expense mainly due to tenant insolvencies, and a lower recovery of operating expenses, partially offset by higher basic rent; and
 - A decrease of \$433 from the sale of Heritage Towne Centre, Calgary, during the second quarter of 2024.
- An increase of \$104 due to the change in the U.S. dollar foreign exchange rate.

NOI from the office portfolio for the three months ended June 30, 2025 decreased by \$3,924, or 11.4%, to \$30,419, compared to \$34,343 in 2024, primarily due to the following:

- An increase of \$953 primarily due to a higher recovery of operating expenses;
- A decrease of \$1,436 due to lower non-recurring lease cancellation fees received compared to 2024; and
- An increase of \$1,154 from the acquisition of Telus Garden, Vancouver, during the fourth quarter of 2024.

NOI from the hotel portfolio for the three months ended June 30, 2025 increased by \$480, or 16.8%, to \$3,342, compared to \$2,862 in 2024, primarily due to the following:

- An increase of \$83 mainly due to an increase in occupancy from 80.3% to 82.8%, partially offset by a decrease in ADR of \$0.66 from \$222.18 to \$221.52, resulting in an overall increase in RevPar of \$5.05 from \$178.41 to \$183.46. Partially offsetting the increase in RevPar was an increase in operating expenses; and
- An increase of \$397 due to the Hotel Portfolio Disposition.

Interest expense for the three months ended June 30, 2025, increased by \$376, or 0.6%, to \$63,610, compared to 63,234 in 2024, mainly due to an increase in interest on bank indebtedness, partially offset by lower interest on Debentures and an increase in interest capitalized to properties under development. The increase in interest on bank indebtedness is due to a higher amount borrowed on the Company's operating lines of credit. The decrease in interest on Debentures is primarily due to the repayment of Series F unsecured debentures on November 27, 2024.

PROPERTY MANAGEMENT AND CORPORATE

Property management and corporate expenses for the three months ended June 30, 2025, increased by \$180, or 0.8%, to \$21,789, compared to \$21,609 in 2024, primarily due to an increase in salary costs.

For the three months ended June 30, 2025, the Company recognized the following fair value gain (loss):

- A net fair value gain of \$50,149 in the residential portfolio, mainly due to an increase in stabilized NOI across the Company's Canadian and U.S. residential portfolio, partially offset by an adjustment on realty taxes accounted for under IFRIC 21.
- A net fair value loss of \$8,739 in the retail portfolio, due to a decrease in projected cash flows at several of the Company's Canadian enclosed malls, as well as an adjustment on realty taxes accounted for under IFRIC 21.
- A net fair value loss of \$16,797 in the office portfolio, primarily due to a decrease in projected cash flows.

The increase in deferred income tax expense for the three months ended June 30, 2025 is primarily due to a higher fair value gain recorded on the Company's Canadian and U.S. properties.

PENSION PLANS

The Company maintains a defined benefit pension plan that provides benefits based on length of service and final average earnings under the Morguard Corporation Employee Retirement Plan (the "Morguard Plan"), as well as a defined benefit plan that provides benefits based on years of service, years of contributions and annual earnings under the Morguard Investments Limited Employees' Retirement Plan (the "MIL Plan"). Effective January 1, 2008, members of the MIL Plan and new employees of the Company commenced participation under the new defined contribution provisions of the Morguard Plan.

During 2024, the MIL Plan merged with the Morguard Plan, which resulted in a net asset transfer from the MIL Plan to the Morguard Plan. The asset transfer of the MIL Plan was completed on July 1, 2024, and treated as a "plan combination". The defined benefit obligation of the MIL Plan was determined as of June 30, 2024, using actuarial assumptions appropriate on that date, and then transferred to the Morguard Plan along with the MIL Plan assets. Members of the Morguard Plan and the MIL Plan will continue to receive the full value of pension benefits accrued prior to the merger.

- A decrease in Canadian retail properties of \$2,738 primarily resulting from:
 - A decrease of \$1,641 primarily due to lower percentage rent at three enclosed shopping centres and higher vacancy and higher bad debt expense mainly due to tenant insolvencies; and
 - A decrease of \$1,097 from the sale of Heritage Towne Centre, Calgary, during the second quarter of 2024.
- An increase of \$472 due to the change in the U.S. dollar foreign exchange rate.

NOI from the office portfolio for the six months ended June 30, 2025 decreased by \$7,711, or 11.2%, to \$61,126, compared to \$68,837 in 2024, primarily due to the following:

- A decrease of \$7,731 primarily due to lower gross rent and higher vacancy at Penn West Plaza, resulting from the Obsidian Lease Expiry;
- An increase of \$690 primarily due to a higher recovery of operating expenses and higher step rent, partially offset by higher vacancy;
- A decrease of \$2,240 due to lower non-recurring lease cancellation fees received compared to 2024;
- An increase of \$2,338 from the acquisition of Telus Garden, Vancouver, during the fourth quarter of 2024; and
- A decrease of \$768 from the sale of 181 Queen Street, Ottawa, during the first quarter of 2024.

NOI from the hotel portfolio for the six months ended June 30, 2025 increased by \$353, or 9.6%, to \$4,018, compared to \$3,665 in 2024, primarily due to the following:

- An increase of \$1,004 due to the Hotel Portfolio Disposition.
- A decrease of \$651 mainly due to a decrease in occupancy from 73.1% to 72.1%, partially offset by an increase in ADR of \$0.91 from \$204.01 to \$204.92, resulting in an overall decrease in RevPar of \$1.39 from \$149.13 to \$147.74.

MANAGEMENT AND ADVISORY FEES

Morguard's management and advisory fees revenue for the six months ended June 30, 2025 decreased by \$271, or 1.3%, to \$19,908, compared to \$20,179 in 2024, primarily due to lower project management and disposition fees earned, partially offset by an increase in asset management and leasing fees earned.

Interest and other income for the six months ended June 30, 2025 decreased by \$252, or 2.9%, to \$8,556, compared to \$8,808 in 2024. The decrease was primarily due to lower interest income earned.

For the six months ended June 30	2025	2024
Mortgages payable	\$98,321	\$99,010
Debentures payable, net of accretion	13,290	18,720

	127,979	128,376
Less: Interest capitalized to properties under development	(1,384)	(260)
	\$126,595	\$128,116

Interest expense for the six months ended June 30, 2025 decreased by \$1,521, or 1.2%, to \$126,595, compared to \$128,116 in 2024, mainly due to a decrease in interest on Debentures, an increase in interest capitalized to properties under development, and lower interest on mortgages payable, partially offset by higher interest on bank indebtedness. The decrease in interest on Debentures is primarily due to the repayment of Series E and Series F senior unsecured debentures on January 25, 2024 and November 27, 2024, respectively. The increase in interest on bank indebtedness is due to a higher amount borrowed on the Company's operating lines of credit. The decrease in interest on mortgages payable is largely attributable to properties financed at lower fixed and floating rates of interest, partially offset by a change in foreign exchange rates increasing U.S. mortgage interest by \$652.

PROPERTY MANAGEMENT AND CORPORATE

Property management and corporate expenses for the six months ended June 30, 2025 increased by \$1,774, or 3.9%, to \$46,714, compared to \$44,940 in 2024, primarily due to an increase in salary costs, partially offset by a higher non-cash adjustment to reduce compensation expense related to the Company's SARs plan.

For the six months ended June 30, 2025, the Company recognized the following fair value gain (loss):

- A net fair value gain of \$130,193 in the residential portfolio, mainly due to an increase in stabilized NOI across the Company's Canadian residential portfolio and an adjustment on realty taxes accounted for under IFRIC 21, partially offset by a decrease in stabilized NOI in the U.S. residential portfolio.
- A net fair value loss of \$14,806 in the retail portfolio, due to a decrease in projected cash flows at several of the Company's Canadian enclosed malls as well as a result of certain leases being disclaimed through future restructuring or insolvency proceedings, partially offset by an adjustment on realty taxes accounted for under IFRIC 21; and

For the six months ended June 30, 2025, the Company recorded an income tax expense of \$42,621, compared to \$27,501 in 2024. The increase in income tax expense of \$15,120 comprises an increase of \$34,736 in deferred tax expense, partially offset by a decrease of \$19,616 in current tax expense.

The decrease in current tax expense for the six months ended June 30, 2025 is primarily the result of a decrease of \$19,050 relating to the disposal of properties that occurred in 2024 and due to the Company undertaking a cost segregation study on specific U.S. properties that impacted the timing of the utilization of net operating losses.

The increase in deferred income tax expense for the six months ended June 30, 2025 is primarily due to a higher fair value gain recorded on the Company's Canadian and U.S. properties.

FUNDS FROM OPERATIONS

FFO (and FFO per common share) is a non-GAAP financial measure that does not have any standardized meaning prescribed by IFRS and is not necessarily comparable to similar measures presented by other reporting issuers in similar or different industries. This measure should be considered as supplemental in nature and not as a substitute for related financial information prepared in accordance with IFRS. FFO is computed by the Company in accordance with the current definition of the Real Property Association of Canada ("REALPAC") and is widely used as a real estate industry standard that supplements net income and evaluates operating performance but is not indicative of funds available to meet the Company's cash requirements. Additional information on this non-GAAP financial measure can be found in Part I, "Specified Financial Measures."

The following table provides an analysis of the Company's FFO by component:

The increase in FFO of \$9,138 is mainly due to a decrease in current income taxes of \$4,155, a decrease in non-controlling interests' share of FFO of \$1,523 and a decrease in unrealized changes in the fair value of financial instruments of \$5,391, partially offset by a decrease in Adjusted NOI of \$1,019 and an increase in interest expense of \$376.

For the six months ended June 30, 2025, the Company recorded FFO of \$103,761 (\$9.69 per common share), compared to \$79,324 (\$7.33 per common share) in 2024. The increase in FFO of \$24,437 is mainly due to a decrease in interest expense of \$1,521, a decrease in non-controlling interests' share of FFO of \$3,257 and a decrease in unrealized changes in the fair value of financial instruments of \$23,403, partially offset by a decrease in Adjusted NOI of \$1,933 and an increase in property management and corporate expenses of \$1,774.

This measure should be considered as supplemental in nature and not as a substitute for related financial information prepared in accordance with IFRS. Normalized FFO is computed as FFO excluding non-recurring items on a net of tax basis and other non-cash fair value adjustments. The Company believes it is useful to provide an analysis of Normalized FFO which excludes non-recurring items on a net of tax basis and other non-cash fair value adjustments excluded from REALPAC's definition of FFO described above. Additional information on this non-GAAP financial measure can be found in Part I, "Specified Financial Measures."

Real estate properties		
Multi-suite residential	\$6,729,944	\$6,769,886
Retail	2,121,991	2,152,748

Real estate properties decreased by \$25,026 at June 30, 2025 to \$11,023,459, compared to \$11,048,485 at December 31, 2024. The decrease is primarily a result of the following:

- Capitalization of property enhancements, including capital expenditures and tenant improvements, totalling \$60,449;
- Development expenditures of \$42,523;
- A fair value gain on real estate properties of \$96,459; and
- A decrease of \$222,598 due to the change in the U.S. dollar exchange rate.

APPRAISAL CAPITALIZATION AND DISCOUNT RATES

The Company's internal valuation team consists of Appraisal Institute of Canada ("AIC") designated Accredited Appraiser Canadian Institute ("AACI") members who are qualified to offer valuation and consulting services and expertise for all types of real property, all of whom are knowledgeable and have recent experience in the fair value techniques for investment properties. AACI members must adhere to AIC's Canadian Uniform Standards of Professional Appraisal Practice and undertake ongoing professional development. The Company's appraisal division is responsible for determining the fair value of investment properties every quarter, which include co-owned properties and properties classified as equity-accounted investments. The Company's valuation processes and results are reviewed by the Company's senior management at least once every quarter, in line with the Company's quarterly reporting dates.

As at June 30, 2025, using the direct capitalization approach, the multi-suite residential, retail and office properties were valued using capitalization rates in the range of 3.3% to 10.3% (December 31, 2024 - 3.3% to 10.3%), resulting in an overall weighted average capitalization rate of 5.6% (December 31, 2024 - 5.6%).

The stabilized capitalization rates by product type are set out in the following table:

As at	June 30, 2025					December 31, 2024				
	Occupancy Rates		Capitalization Rates			Occupancy Rates		Capitalization Rates		
	Max.	Min.	Max.	Min.	Weighted Average	Max.	Min.	Max.	Min.	Weighted Average
Multi-suite residential	98.5%	92.0%	6.3%	3.3%	4.4%	98.5%	92.0%	6.3%	3.3%	4.4%
Retail	99.0%	85.0%	10.3%	5.0%	7.5%	99.0%	85.0%	10.3%	5.0%	7.4%
Office ⁽¹⁾	100.0%	85.0%	9.5%	5.0%	7.6%	100.0%	85.0%	9.5%	4.6%	7.7%

(1) Includes industrial properties comprising approximately 11% of the segment's total assets.

The key valuation metrics used in the discounted cash flow method for the retail and office properties are set out in the following table:

As at	June 30, 2025			December 31, 2024		
	Maximum	Minimum	Weighted Average	Maximum	Minimum	Weighted Average
Retail						
Discount rate	11.3%	5.8%	7.7%	11.3%	5.8%	7.7%
Terminal cap rate	10.3%	5.3%	6.7%	10.3%	5.3%	6.7%
Office						
Discount rate	10.0%	5.9%	7.3%	10.0%	5.1%	7.2%
Terminal cap rate	9.5%	5.3%	6.5%	9.5%	4.8%	6.5%

Fair values are most sensitive to changes in discount rates, capitalization rates and stabilized or forecast net operating income. Generally, an increase in stabilized net operating income will result in an increase in the fair value of the income producing properties and an increase in capitalization rates will result in a decrease in the fair value of the properties. The capitalization rate magnifies the effect of a change in stabilized net operating income, with a lower capitalization rate resulting in a greater impact on the fair value of the property than a higher capitalization rate.

The sensitivity of the fair values of the Company's income producing properties as at June 30, 2025, and December 31, 2024, is set out in the table below:

As at	June 30, 2025		December 31, 2024	
Change in capitalization rate:	0.25%	(0.25%)	0.25%	(0.25%)
Multi-suite residential	(\$346,035)	\$386,506	(\$360,692)	\$404,402
Retail	(63,508)	67,924	(66,253)	71,008
Office ⁽¹⁾	(62,500)	66,787	(57,961)	61,854
	(\$472,043)	\$521,217	(\$484,906)	\$537,264

(1) Includes industrial properties comprising approximately 11% of the segment's total assets.

The presentation of Non-Consolidated Basis measures represents a non-GAAP financial measure and is presented in this MD&A because management considers these non-GAAP financial measures to be an important measure to evaluate and monitor the Company's compliance with its Indenture.

The covenants that govern the Unsecured Debentures are calculated using the Company's published results prepared in accordance with IFRS adjusted as required to account for the Company's Public Entity Investments using the equity method of accounting and other adjustments defined by the Indenture. The presentation of the Non-Consolidated balance sheet does not classify short-term and long-term assets and liabilities. In addition, other assets as presented in the non-consolidated balance sheet, group amounts receivable; prepaid expenses and other; and cash that are presented as a separate financial statement line in the Company's consolidated balance sheet, and loans payable and bank indebtedness that are presented as a separate financial statement line in the Company's consolidated balance sheet, have been grouped as a single financial statement line in the non-consolidated balance sheet.

The Company must maintain an interest coverage ratio computed on a Non-Consolidated Basis above 1.65 times, an indebtedness to aggregate assets ratio computed on a Non-Consolidated Basis not to exceed 65% and a minimum equity requirement computed on a Non-Consolidated Basis of at least \$300,000. If the Company does not meet these covenants, the Unsecured Debentures will become immediately due and payable unless the Company is able to remedy the default or obtain a waiver from lenders.

Non-Consolidated Basis adjustments include the following:

- An adjustment (as defined in the Indenture) to account for the Company's Public Entity Investments using the equity method of accounting ("Equity Adjustment"). The adjustment requires the Public Entity Investments which are consolidated under IFRS to each respective financial statement line presented within the balance sheet and statement of income (loss) to be presented on a single line within equity-accounted investments;
- An adjustment (as defined in the Indenture) to the balance sheet to exclude deferred tax assets and liabilities, goodwill and to add back accumulated amortization of hotel properties ("Balance Sheet Indenture Adjustment"); and

- An adjustment (as defined in the Indenture) to the statement of income (loss) to exclude other non-cash items (such as the Company's SARs expense, IFRIC 21 and any gain or loss attributed to the sale or disposition of any asset or liability), non-recurring items (such as acquisition-related costs and debt settlement or other costs), and to include the distributions received from Morguard REIT and Morguard Residential REIT ("Income Statement Indenture Adjustment").

In addition, the Company has \$1,139,000 of unencumbered income producing properties and other investments which could be utilized for financing.

The Company has approximately \$1,265,000 of mortgages payable maturing during 2025 and 2026, having an aggregate loan-to-value ratio of 44%, which management expects to be able to refinance at similar or favourable terms. In addition, the Company has \$175,000 of senior unsecured debentures maturing in September 2026 and \$99,000 of unsecured convertible debentures maturing in December 2026. The Company expects to be able to issue new debt instruments and use current liquidity to permit the repayment of the 2025 and 2026 maturities.

Net cash flows provided by operating activities represent the primary source of liquidity to fund dividends and maintenance capital expenditures (excluding new acquisition and development spending) on the Company's real estate properties. The Company's net cash flows provided by operating activities are dependent upon the occupancy level of its rental properties, rental rates on its leases, collectibility of rent from its tenants, level of operating expenses and other factors. Accordingly, the Company does not repay maturing debt from cash flows but rather with proceeds from refinancing such debt or financing unencumbered properties. Material changes in these factors may adversely affect the Company's cash flows provided by operating activities and liquidity.

SUMMARY OF MATERIAL ACCOUNTING POLICIES AND ESTIMATES

The Company's unaudited condensed consolidated financial statements for the three and six months ended June 30, 2025 and 2024, have been prepared in accordance with IAS 34, Interim Financial Reporting, as issued by the IASB. The condensed consolidated financial statements use the same accounting policies and methods of their application as the most recent annual audited consolidated financial statements and accompanying notes for the year ended December 31, 2024, which include the material accounting policies most affected by estimates and judgements, and should be read in conjunction with the most recent annual audited consolidated financial statements.

The MD&A for the year ended December 31, 2024, contains a discussion of the material accounting policies most affected by estimates and judgments used in the preparation of the consolidated financial statements, being the accounting policies relating to *de facto* control, estimates of fair value of real estate properties, valuation of financial instruments and the determination of whether an acquisition represents a business combination or an asset acquisition. Management determined that as at June 30, 2025, there is no change to the assessment of the material accounting policies most affected by estimates and judgments as detailed in the MD&A for the year ended December 31, 2024.

FINANCIAL INSTRUMENTS

The following describes the Company's recognized and unrecognized financial instruments.

The Company's financial assets and financial liabilities comprise cash, restricted cash, amounts receivable, finance lease receivable, accounts payable and accrued liabilities, bank indebtedness, mortgages payable, loans payable, lease liabilities, Unsecured Debentures and convertible debentures (excluding any conversion option).

Financial assets must be classified and measured on the basis of both the business model by which the assets are managed and the contractual cash flow characteristics of the asset. Financial assets subsequent to initial recognition are classified and measured based on three categories: amortized cost, fair value through other comprehensive income ("FVTOCI") and fair value through profit and loss ("FVTPL"). Financial liabilities are classified and measured based on two categories: amortized cost and FVTPL. Fair values of financial assets and financial liabilities are presented as follows:

Fair Value of Financial Assets and Financial Liabilities

The fair values of cash, restricted cash, amounts receivable, accounts payable and accrued liabilities, and bank indebtedness approximate their carrying values due to the short-term maturity of those instruments. The fair values of mortgages and loans receivable are based on the current market conditions for financing loans with similar terms and risks. The loans payable are reflected at fair value since they are based on a floating interest rate and reflect the terms of current market conditions.

Mortgages payable, Unsecured Debentures, convertible debentures, lease liabilities and finance lease receivable are carried at amortized cost using the effective interest method of amortization. The estimated fair values of long-term borrowings have been determined based on market information, where available, or by discounting future payments of interest and principal at estimated interest rates expected to be available to the Company.

The fair value of mortgages payable has been determined by discounting the cash flows of these financial obligations using June 30, 2025 market rates for debts of similar terms. Based on these assumptions, the fair value as at June 30, 2025 of mortgages payable before deferred financing costs and mark-to-market adjustments is estimated at \$4,136,187 (December 31, 2024 - \$4,656,335), compared to the carrying value of \$4,671,616 (December 31, 2024 - \$4,791,513). The fair value of mortgages payable varies from the carrying value due to fluctuations in interest rates since their issue.

The fair value of the Unsecured Debentures liability is based on their closing bid price. As at June 30, 2025, the fair value of Unsecured Debentures is estimated at \$185,463 (December 31, 2024 - \$186,555), compared to the carrying value of \$175,000 (December 31, 2024 - \$175,000).

The fair value of the convertible debentures liability is based on their market trading price. As at June 30, 2025, the fair value of convertible debentures before deferred financing costs is estimated at \$151,213 (December 31, 2024 - \$152,244), compared to the carrying value of \$150,000 (December 31, 2024 - \$150,000).

The fair value of the finance lease receivable is determined by discounting the cash flows of the finance lease receivable using June 30, 2025 market rates for debt of similar terms. Based on these assumptions, as at June 30, 2025, the fair value of the finance lease receivable is estimated at \$59,585 (December 31, 2024 - \$59,335).

RISKS AND UNCERTAINTIES

All investment properties are subject to a degree of risk and uncertainty. Income from real estate assets is affected by various factors, including general economic conditions and local market circumstances. Local business conditions such as oversupply of space or a reduction in demand particularly affect income property investments. The major categories of risk the Company encounters in conducting its business and some of the actions it takes to mitigate these risks are outlined in the Company's MD&A for the year ended December 31, 2024 and the Company's most recent Annual Information Form, dated February 20, 2025 and provide a more detailed discussion of these and other risks.

CONTROLS AND PROCEDURES CONCERNING FINANCIAL INFORMATION

The financial certification process project team has documented and assessed the design of the internal controls in order to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with IFRS. This undertaking has enabled the Chief Executive Officer and Chief Financial Officer to attest that the design of the internal controls with regard to financial information is effective using the Committee of Sponsoring Organizations of the Treadway Commission (COSO) Internal Control - Integrated Framework (2013). In order to ensure that the consolidated financial statements and MD&A present fairly, in all material respects, the financial position of the Company and the results of its operations, management is responsible for establishing and maintaining disclosure controls and procedures, as well as internal control over financial reporting.

The Company's management has evaluated the effectiveness of the Company's disclosure controls and procedures and, based on such evaluation, has concluded that their design is adequate and effective as of and for the six months ended June 30, 2025. The Company's management has also evaluated the effectiveness of the internal controls over financial reporting and has concluded that their design is effective as of and for the six months ended June 30, 2025.

An information disclosure policy constitutes the framework for the information disclosure process with regard to the annual and interim filings, as well as other reports filed or submitted under securities legislation. This policy aims in particular at identifying material information and validating the related reporting. The Disclosure Committee, established in 2005, is responsible for ensuring compliance with this policy. Senior management acts as the Disclosure Committee, ensuring compliance with this policy and reviewing the main documents to be filed with regulatory authorities to ensure that all significant information regarding operations is communicated in a timely manner.

SUMMARY OF QUARTERLY RESULTS

A significant portion of the Company's real estate properties are located in the United States. As a result, the Company is exposed to foreign currency exchange rate fluctuations with respect to its quarterly results derived from its properties located in the U.S.

Quarterly results fluctuate due to acquisitions and dispositions, the impact of foreign exchange rate fluctuations and new mortgage financing as well as mortgage refinancing. In addition, net income (loss) includes a number of non-cash components, such as fair value gain/loss on Morguard Residential REIT units, fair value gain/loss on real estate properties, fair value gain/loss on investments in marketable securities and other fund investments, an IFRIC 21 adjustment to realty taxes, equity income (loss) from investment and deferred taxes.

The Company's significant real estate property transactions for the previous eight quarters are as follows:

Year	Quarter	Asset Class	Transaction	Sq. Ft.	# of rooms/suites
2024	Fourth	Office ⁽¹⁾	Acquisition	557,000	—
2024	Fourth	Industrial	Disposition	27,950	—
2024	Second	Retail	Disposition	131,000	—
2024	Second	Hotels ⁽²⁾	Disposition	—	299
2024	First	Industrial	Disposition	12,725	—
2024	First	Office	Disposition	250,500	—
2024	First	Hotels	Disposition	—	2,115
2023	Fourth	Residential	Acquisition	—	232

(1) The Company acquired a 20% interest in the property; total square feet is stated at 100% basis.

(2) The Company sold its 50% interest in two joint ventures; total number of rooms is stated at 100% basis.

Revenue and Net Operating Income

The regional distribution of the Company's properties serves to add stability to the Company's cash flows because it reduces the Company's vulnerability to economic fluctuations affecting any particular region. In addition, the Company's tenant mix is diversified therefore limiting its exposure to any one tenant.

The Company has seen steady revenue growth leading up to the first quarter of 2024. The decline in revenue during 2024 was primarily impacted by the Hotel Portfolio Disposition. In addition, lower hotel revenue during the first quarters of 2025 and 2024 is seasonally impacted by the colder months. The change in foreign exchange rates and the impact of acquisition net of disposal of properties (described above) also contributed to the fluctuation in revenue during the last eight quarters.

Similar to the reasons described above, NOI over the last eight quarters has followed a similar pattern from an increase in revenue and the Company's ability to control expenses as a percentage of revenue. The impact of foreign exchange rates and of acquisitions and dispositions also factor into the variance from quarter to quarter. The first quarter results (three months ended March 31) are impacted by IFRIC 21, whereby the Company records the entire annual realty tax expense for its U.S. properties on January 1, except for U.S. properties acquired during the year in which the realty taxes are not recorded in the year of acquisition. As a result, the second, third and fourth quarters typically have no realty tax expense which results in higher NOI and NOI margins. Adjusted NOI which excludes IFRIC 21 is presented in the table above to illustrate a more comparable quarter-to-quarter analysis.

Net Income (Loss) Attributable to Common Shareholders

Taking into account the above factors for revenue and NOI variations, the change in net income (loss) resulted from the following non-cash components:

- The Company valued the Morguard Residential REIT units (presented as a liability under IFRS) based on the closing price of the TSX-listed units, resulting in a fair value gain/loss on MRG units recorded to net income (loss);
- The Company recorded a fair value gain on real estate properties for the six months ended June 30, 2025, mainly due to increase in stabilized NOI and an IFRIC 21 adjustment at the Company's residential portfolio. The Company recorded fair value loss on real estate properties during the year ended December 31, 2024, mainly due to an increase in valuation parameters at the Company's retail and office properties;
- During the six months ended June 30, 2025, the Company recorded a deferred income tax expense due to a net fair value gain recorded on the Company's Canadian and U.S. properties. For the year ended December 31, 2024, the Company recorded a deferred income tax expense mainly due to the recognition of previously unrecognized benefit of tax losses, partly offset by a net fair value loss recorded on the Company's real estate properties; and
- During the three months ended March 31, 2024, the Company recorded a gain on sale of hotel properties of \$150,587.

Capitalization Rates

As at June 30, 2025, and December 31, 2024, the Company had its portfolio internally appraised. In addition, the Company's U.S. portfolio is appraised by independent U.S. real estate appraisal firms on a three-year cycle.

The Company determined the fair value of each income producing property based upon, among other things, rental income from current leases and assumptions about rental income from future leases reflecting market conditions at the applicable consolidated balance sheet dates, less future cash outflow pertaining to the respective leases. The Company's multi-suite residential properties are appraised using the direct capitalization of income method. The retail, office and industrial properties are appraised using a number of approaches that typically include a discounted cash flow analysis, a direct capitalization of income method and a direct comparison approach. The discounted cash flow analysis is primarily based on discounting the expected future cash flows, generally over a term of 10 years, and includes a terminal value based on the application of a capitalization rate to estimated year-11 cash flows.

As at June 30, 2025, using the direct capitalization approach, the multi-suite residential, retail and office properties were valued using capitalization rates in the range of 3.3% to 10.3% (December 31, 2024 - 3.3% to 10.3%), resulting in an overall weighted average capitalization rate of 5.6% (December 31, 2024 - 5.6%).

The stabilized capitalization rates by asset type are set out in the following table:

As at	June 30, 2025					December 31, 2024				
	Occupancy Rates		Capitalization Rates			Occupancy Rates		Capitalization Rates		
	Max.	Min.	Max.	Min.	Weighted Average	Max.	Min.	Max.	Min.	Weighted Average
Multi-suite residential	98.5%	92.0%	6.3%	3.3%	4.4%	98.5%	92.0%	6.3%	3.3%	4.4%
Retail	99.0%	85.0%	10.3%	5.0%	7.5%	99.0%	85.0%	10.3%	5.0%	7.4%
Office ⁽¹⁾	100.0%	85.0%	9.5%	5.0%	7.6%	100.0%	85.0%	9.5%	4.6%	7.7%

⁽¹⁾ Includes industrial properties comprising approximately 11% of the segment's total assets.

The key valuation metrics used in the discounted cash flow method for the retail and office properties are set out in the following table:

As at	June 30, 2025			December 31, 2024		
	Maximum	Minimum	Weighted Average	Maximum	Minimum	Weighted Average
Retail						
Discount rate	11.3%	5.8%	7.7%	11.3%	5.8%	7.7%
Terminal cap rate	10.3%	5.3%	6.7%	10.3%	5.3%	6.7%
Office						
Discount rate	10.0%	5.9%	7.3%	10.0%	5.1%	7.2%
Terminal cap rate	9.5%	5.3%	6.5%	9.5%	4.8%	6.5%

Fair values are most sensitive to changes in discount rates, capitalization rates and stabilized or forecast net operating income. Generally, an increase in stabilized net operating income will result in an increase in the fair value of the income producing properties, and an increase in capitalization rates will result in a decrease in the fair value of the properties. The capitalization rate magnifies the effect of a change in stabilized net operating income, with a lower capitalization rate resulting in a greater impact on the fair value of the property than a higher capitalization rate. If the weighted average stabilized capitalization rates were to increase or decrease by 25 basis points (assuming no change in stabilized net operating income), the value of the income producing properties as at June 30, 2025 would decrease by \$472,043 and increase by \$521,217, respectively.

The sensitivity of the fair values of the Company's income producing properties as at June 30, 2025, and December 31, 2024, is set out in the table below:

CONTINGENCIES

The Company is contingently liable with respect to litigation, claims and environmental matters that arise from time to time, including those that could result in mandatory damages or other relief, which could result in significant expenditures. While the final outcome of these matters cannot be predicted with certainty, in the opinion of management, any uninsured liability that may arise from such contingencies would not have a material adverse effect on the financial position or results of operations of the Company. Any settlement of claims in excess of amounts recorded will be charged to operations as and when such determination is made.

NOTE 25

MANAGEMENT OF CAPITAL

Refer to the Company's annual audited consolidated financial statements as at and for the year ended December 31, 2024 for an explanation of the Company's capital management policy.

As at	June 30, 2025	December 31, 2024
Mortgages payable, principal balance	\$4,671,616	\$4,791,513
Unsecured Debentures, principal balance	175,000	175,000

Shareholders' equity	4,312,250	4,292,423

The Company monitors its capital structure primarily based on an interest coverage ratio and a debt to gross book value ratio. These ratios are used by the Company to manage an acceptable level of leverage and are calculated in accordance with the terms of the specific agreements with creditors and are not considered measures in accordance with IFRS, nor is there an equivalent IFRS measure.

The Company's Unsecured Debentures contain covenants that are calculated on a non-consolidated basis, which represents the Company's consolidated results prepared in accordance with IFRS as shown on the Company's most recently published annual audited consolidated financial statements, adjusted, as required, to account for the Company's public entity investments in Morguard Residential REIT and Morguard REIT using the equity method. The covenants that the Company must maintain are a non-consolidated interest coverage ratio above 1.65 times, a non-consolidated debt to gross book value ratio not to exceed 65% and a minimum non-consolidated equity requirement of at least \$300,000. If the Company does not meet these covenants, the Unsecured Debentures will become immediately due and payable unless the Company is able to remedy the default or obtain a waiver from debenture holders. The Company is in compliance with all Unsecured Debenture covenants.

NOTE 26

FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

Refer to the Company's annual audited consolidated financial statements as at and for the year ended December 31, 2024 for an explanation of the Company's risk management policy as it relates to financial instruments.

Fair Value of Financial Assets and Financial Liabilities

The fair values of cash, restricted cash, amounts receivable, accounts payable and accrued liabilities and bank indebtedness approximate their carrying values due to the short-term maturity of those instruments. The fair values of mortgages and loans receivable are based on the current market conditions for financing loans with similar terms and risks. The loans payable are reflected at fair value since they are based on a floating interest rate and reflect the terms of current market conditions.

Mortgages payable, Unsecured Debentures, convertible debentures, lease liabilities and finance lease receivable are carried at amortized cost using the effective interest rate method of amortization. The estimated fair values of long-term borrowings have been determined based on market information, where available, or by discounting future payments of interest and principal at estimated interest rates expected to be available to the Company.

The fair value of the mortgages payable has been determined by discounting the cash flows of these financial obligations using June 30, 2025 market rates for debts of similar terms (Level 2). Based on these assumptions, the fair value as at June 30, 2025 of mortgages payable before deferred financing costs and mark-to-market adjustments is estimated at \$4,136,187 (December 31, 2024 - \$4,656,335), compared to the carrying value of \$4,671,616 (December 31, 2024 - \$4,791,513). The fair value of the mortgages payable varies from the carrying value due to fluctuations in interest rates since their issue.

The fair value of the Unsecured Debentures liability is based on its closing bid price (Level 1). As at June 30, 2025, the fair value of the Unsecured Debentures has been estimated at \$185,463 (December 31, 2024 - \$186,555), compared to the carrying value of \$175,000 (December 31, 2024 - \$175,000).

The fair value of the convertible debentures liability is based on their market trading prices (Level 1). As at June 30, 2025, the fair value of the convertible debentures before deferred financing costs has been estimated at \$151,213 (December 31, 2024 - \$152,244), compared to the carrying value of \$150,000 (December 31, 2024 - \$150,000).

The fair value of the finance lease receivable is determined by discounting the cash flows of the finance lease receivable using June 30, 2025, market rates for debt on similar terms (Level 3). Based on these assumptions, as at June 30, 2025, the fair value of the finance lease receivable has been estimated at \$59,585 (December 31, 2024 - \$59,355).

The fair value hierarchy of financial instruments and real estate properties measured at fair value in the consolidated balance sheets is as follows:
